

Board Questions from April 27, 2017

Kathy Roberts asked the following:

1. Who compiles data related to the release of resident students? Is this data considered in the budget planning process?

The District Records Department processes and tracks all resident students' out of district transfer requests. Data is used in our budgeting process, from enrollment, spending/revenue trends, to student achievement.

2. Does the district do any outreach to gather information regarding the reasons North Kitsap families are choosing to enroll their children in other school districts?

Yes, each family is asked to complete an "NKSD Exit Survey". During the November 10, 2016 NKSD School Board Meeting, agenda item 7.1.4 contained a report on exit survey results.

3. Finally, there seems to be a disconnect with the understanding of enrollment data when the superintendent is unaware of over 348 North Kitsap students choosing to attend school in other districts.

The superintendent is fully aware this information. Additionally, an annual report to the board provides this information in detail. Item 7.1.6: "Out of District and Inter-District Student Transfers" from the November 10, 2016 NKSD School Board Meeting contains this data.

Questions from School Board meeting April 27

Loretta Byrnes

Why are there no community members on the curriculum review team?

State law allows for parents to participate, as long as they are board approved.

What is the health resource that has been recommended by the staff to the IMC?

The 2015 edition of *Comprehensive Health* was brought to the IMC but was not recommended due to the publishing date (ideally it would be more recent). The new 2018 version is now in print. We anticipate that it will be brought to the IMC by staff on May 18th.

How will parents and community members be involved in the curriculum approval process?

Opportunity is made for public viewing during every materials adoption process and is announced through the website and other typical district communication methods.
